LVO Production Update

Due to continued uncertainty about material deliveries for Conventional production, LVO **Second Shift Conventional Production employees** (Vehicle 1 Chassis – Rough & Finish, Chassis Paint 1, Cab 1, Sleeper line, Engine 1, and Sub-assembly areas) **will need to call the Mack Trucks LVO Hotline at 877-377-2279 after 11:00 a.m. on Friday, September 10 for an update on LVO's Second Shift production schedule for Friday, September 10.**

Second Shift Materials and Second Shift LVLC employees will also need to call the Hotline.

All other areas will continue to operate following the regular schedules on all shifts.

We understand the impact these situations have on our employees. The Company will waive the one (1) year seniority requirement to receive the Short Work Week Benefit for eligible employees affected by curtailments.
