Brothers and Sisters,

We are extremely disappointed in Volvo's decision to build a class 8 plant in Mexico as our local leadership have been working closely with Local and State government officials to build a state-of-the-art plant in the Lehigh Valley.

We are looking into the contractual obligations for build rates in LVO Operations and the potential legal ramifications for this decision.

There will be more info as we discuss it as a committee and with International.

More information will be provided as we get it.

This is a slap in the face for all of us. The company provided us with this information at 11:45am and told us that it would be published at 12:00pm.

In Solidarity,

Tim Hertzog
